MANYA B J

+91-9353497265 manyabj85@gmail.com LinkedIn GitHub Portfolio

Summary

Computer Science & Artificial Intelligence Engineering graduate with hands-on experience in software development and AI-based projects. Skilled in Python and Machine Learning with a strong interest in building innovative, data-driven solutions. Passionate about problem-solving in dynamic, fast-paced environments.

Skills

Programming Languages: Python, Java, HTML, C
AI/ML Technologies: Machine Learning, Deep Learning, TensorFlow, Keras, scikit-learn, Pandas, LLM
Tools & Platforms: MS Excel, Power BI, Tableau, Git, GitHub, Google Colab, Jupyter Notebook, VS Code
Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Insight Generation, Descriptive Statistics

Experience

AI & Data Analytics Intern **April 2025 – May 2025**
Edunet Foundation | Remote *Python, SQL, Power BI*

- **Built and trained CNN-based deep learning models** using TensorFlow and Keras, achieving up to 98% accuracy in image classification tasks
- Created **interactive dashboards** in Power BI and Tableau to visualise analytical insights and improve reporting efficiency
- Performed **data preprocessing, model training, and evaluation** using Python to optimise model generalisation and reduce overfitting

AI & Automation Intern **February 2026 – May 2026**
Learner's Byte | Remote *n8n, Generative AI, Webhooks*

- Leveraged **Generative AI concepts** and **n8n automation workflows** to develop intelligent and automated business solutions
- Integrated **webhooks, APIs, and JSON-based workflows** for real-time task automation and process optimisation
- Collaborated on **AI-driven automation projects** to improve pipeline reliability, scalability, and operational productivity

Projects

Pneumonia Prediction Using CNN | *Python, TensorFlow* **Jan 2025 – April 2025**

- Engineered a CNN-based deep learning model to classify chest X-ray images for pneumonia detection with high prediction accuracy
- Applied **data augmentation, class balancing, and transfer learning** to healthcare datasets to boost diagnostic accuracy and model robustness

Sales Dashboard for Regional Performance | *Power BI* **February 2025 – March 2025**

- Conducted **EDA** on multi-year retail sales datasets to identify revenue trends and business performance insights
- Designed **interactive dashboards** in Tableau and Power BI to present KPIs and support data-driven decision-making for stakeholders

AI Objection Handler Agent Using n8n | *n8n, Generative AI* **February 2026 – May 2026**

- Architected an **AI-powered workflow automation system** using n8n, webhooks, and LLM integration to automate intelligent response handling
- Implemented automated workflows for JSON response generation, input validation, and real-time task automation to improve execution throughput

Certifications

- **Programming in Java – NPTEL SWAYAM (2024):** 12-week course covering OOP, exception handling, collections, multithreading, and core Java development – scored 80/100, Silver Elite
- **Machine Learning for All – Coursera (2025):** Supervised, unsupervised, and deep learning techniques with hands-on implementation exercises
- **Data Visualisation – Forage (2025):** Business scenario analysis, dashboard visualisation, and effective communication of analytical insights
- **Excel Basics for Data Analysis – Coursera (2025):** Foundational Excel skills for data analysis, reporting, and visualisation tasks

Education & Achievements

B.E. in Computer Science – Artificial Intelligence Engineering **Graduated: 2026**
Maharaja Institute of Technology Mysore *CGPA: 9.41 / 10*

- Secured **4th Rank** in CSE–Artificial Intelligence (CSE-AI) at **Visvesvaraya Technological University (VTU)**.
- Achieved **Silver Elite** distinction with a score of **80/100** in **NPTEL Programming in Java**
